Applications

The SDX Pro is a one-box hosting solution that can deliver Docker containers, applications, and websites to its local network. By

hosting resources near the network edge, you can reduce latency and make applications more responsive.

Uninterruptible Power

The SDX Pro is equipped with two power inputs and two hot-swappable power supplies. Only one of each is needed to function,

ensuring continuous power delivery even if a cable gets disconnected or if a power supply drops out for any reason.
