

Specialized Features

1 One Cloud, Multiple Players

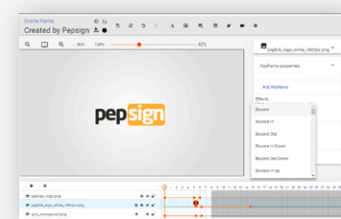

Pepsign Cloud Service is a cloud-based players management solution that enables you to manage unlimited players simultaneously, through any modern browser. Everything can be decided by you in terms of the content, display date and the screen selected. This highly increases the flexibility as you can create and modify your digital signage anytime and anywhere.

3 Rule-based Scheduling

You are able to set the date and time (start & end) of your scenes to be displayed. You can also decide the frequency of the scenes appearance by setting their priority. Besides, you can decide the repetition of the scenes as well by daily basis or on a specific date.

2 User-friendly Animation Maker & Scene Creator

You are able to create effects into the scenes on your own with the built-in effect functions inside Pepsign Cloud Service. By just a few clicks, it makes your videos much more stunning and attractive. Everyone can be a creator of their own advertisements!

4 Automatic Content Updater by Data Grabber

To make your scenes more informative, the "Data Grabber" within Pepsign allows you to forward particular information, especially which vary rapidly with time, from other web sources into your scenes. You can set the grabbing intervals to ensure the data are the most updated as well.
